

## Canadian Workshop on Nuclear- and Astro - Physics of Stars

**Dec. 9/10, 2010**  
TRIUMF  
Vancouver BC

We are pleased to announce the first Canadian Workshop on Nuclear and related Astrophysics of Stars in Canada. In this workshop we wish to bring together Canadian experimental nuclear astrophysicists, theoretical nuclear astrophysicists, theoretical astrophysicists involved in stellar modeling, and observers interested in stellar evolution and elemental abundances. The workshop will be held at the TRIUMF laboratory in Vancouver on December 9 and 10, 2010.

The purpose of this workshop is to evaluate the status of nuclear and related astrophysics in Canada, figure out common interests, discuss the funding situation in Canada and eventually work out how information can flow better between our rather separated communities. It is hoped that common research projects connecting these groups can be formulated and eventually a small scale coordination and research centre be formed to be situated at TRIUMF.

To facilitate discussions, we will leave ample time between talks and will organize a social event on the evening of Thursday, December 9.

There will be a small registration fee of \$60 for the refreshments provided at coffee breaks and lunches.

The registration website is:

<http://mis.triumf.ca/events/event.jsf?confcode=CNAP2010>

Please register as early as possible.
