

# Workshop on Nuclear Physics in Hot Dense Plasmas

Saturday March 12, 2010

6:00 PM	Reception with Snacks and Drinks	Notre Dame London Centre
---------	----------------------------------	--------------------------

Sunday March 13, 2010

8:45 AM	Welcome	Michael Wiescher	University of Notre Dame
<b>1st Session:status of NIF</b>			
9:00 AM	<a href="#">NIF as a laboratory for nuclear physics</a>	Charlie Cerjan	Lawrence Livermore Laboratory
9:30 AM	<a href="#">Implosions on the NIF - Creating unique states of matter</a>	Joe Kilkenny	Lawrence Livermore Laboratory
10:00 AM	<a href="#">Diagnostic Summary &amp; First results - Neutrons</a>	Jac Caggiano	Lawrence Livermore Laboratory
10:15 AM	<a href="#">Diagnostic Summary &amp; First results - Gammas</a>	Wolfgang Stoeffl	Lawrence Livermore Laboratory

**10:30 AM coffee break**

11:00 AM	<a href="#">Nuclear-Plasma experiments @ ICF facilities</a>	Andrea Kritcher	Lawrence Berkely Laboratory
11:30 AM	<a href="#">(n,x) reaction measurements at NIF</a>	Lee Bernstein	Lawrence Livermore Laboratory
12:00 AM	<a href="#">Nuclear astrophysics experiments at NIF</a>	Carl Brune	Ohio University

**12:30 PM lunch break**

<b>2nd Session: alternative techniques</b>			
2:00 PM	<a href="#">AMS of Activated Noble Gases at NIF</a>	Michael Paul	Hebrew University
2:30 PM	<a href="#">Activation diagnostics</a>	Darren Bleuel	Lawrence Livermore Laboratory
3:00 PM	<a href="#">Solid debris collection for radiation chemistry</a>	Julie Gostic	Lawrence Livermore Laboratory

**3:30 PM coffee break**

### 3:45 PM Discussion Contributions

3rd Session: international effords			
4:30 PM	<a href="#">Laser driven Nuclear and Particle Science</a>	Ken Ledingham	Strathclyde University, Glasgow, UK
5:00 PM	<a href="#">Recent theoretical developments in Nuclear Excitation in Plasmas</a>	Gilbert Gosselin	CEA, Paris, France
5:30 PM	<a href="#">Atomic configuration effects on NEET calculations for Th 169</a>	Pascal Morel	CEA, Paris, France
6:00 PM	<a href="#">NEEC realistic experimental scenario at a storage ring</a>	Christophor Kozuharov	GSI, Darmstadt, Germany
6:30 PM	<a href="#">Screening affects in nuclear reactions and</a>	Frank Strieder	RU Bochum, Germany
7:00 PM	<a href="#">Highly charged isomers</a>	Phil Walker	University of Surrey, UK

Monday March 14, 2010

4th Session: nuclear astrophysics			
8:30 AM	<a href="#">s-process physics and techniques</a>	Franz Kaeppler	Forschungszentrum Karlsruhe, Germany
9:15 AM	<a href="#">Status and outlook of neutron induced reaction measurements at the n TOF facility at CERN</a>	Frank Gunsing	CEA, Paris, France
10:15 AM	<b>Coffee Break</b>		
10:45 AM	<a href="#">Measuring Neutron Capture : Opening all the Drawers in the Tool Box</a>	Aaron Couture	Los Alamos Laboratory
11:15 AM	<a href="#">Current experimental aspects of the s-process research</a>	Rene Reifarth	University of Frankfurt, GSI
11:45 AM	<a href="#">Nucleosynthesis in massive stars, the role of electron screening</a>	Rob Hoffmann	Lawrence Livermore Laboratory

12:15 PM lunch break

5th Session: astrophysics measurements at NIF
---

2:00 PM	<a href="#">Measurement of thermonuclear reactions with charged particles</a>	Dennis McNabb	Lawrence Livermore Laboratory
2:30 PM	<a href="#">Test of stellar hydrodynamics predictions</a>	Tomasz Plewa	University of Florida

**3:00 PM Coffee Break**

<b>6th Session: nuclear theory intersection</b>			
3:30 PM	<a href="#">Nuclear-plasma physics from reaction rates</a>	Anna Hayes	Los Alamos Laboratory
4:00 PM	<a href="#">Statistical gamma-ray experiments in support of GRH cross section measurements at NIF</a>	Sunniva Siem	University of Oslo, Norway
4:30 PM	<b>Discussion Contributions</b>
