

## Sensing Our World at MSU 2005

In order to accommodate the number of applicants to the program, two separate week-long, all-day summer camps about sensors and science for students entering 7th and 8th grade were held at MSU: July 18-22 and July 25-29.

The summer program was sponsored by The Center for Sensor Materials, The Joint Institute for Nuclear Astrophysics, The National Superconducting Cyclotron Laboratory, and The Nanoscale Interdisciplinary Research Team - Structure of Nanocrystals, in association with the Capital Area Science and Math Center.

In recognition of 2005 as the celebration of the 100 year anniversary of Einstein's miraculous year, Sensing Our World '05 included a special focus on physics and Einstein.
